

Log Cabin

Quilt Size is approximately 53 x 72

Block Size is 8 inches (8.5 with seam allowances)

Setting is 6 x 6 blocks

Quilt Notes:

- I pieced my blocks using my Accuquilt GO Log Cabin die but you can piece yours using any method you choose. The strips should be cut 1.5 inches if you want your blocks the same size as mine.
- Any layout can be used for the 36 log cabin blocks that make up the center of the quilt. I've chosen to use a barn raising setting.
- Because I don't like square quilts, two extra borders are used on the top and bottom of the quilt to create a rectangular quilt.
- Quilt size can be increased by making more blocks, by increasing the width of your strips, or by adding additional blocks.

Log Cabin blocks – Make 36

I used only Strips 1-8 on the Log Cabin Accuquilt GO die

Because my quilt is scrappy, I chose a variety of reds and black/white prints and cut enough for 8-10 blocks at a time. For the entire quilt you will need to cut 36 reds and 36 black/white prints. I used each of my prints about 2-3 times and 'shuffled' my stacks to make my blocks scrappy.

Logs are pieced in the following order and the largest red log was not used. Set those aside and they can be trimmed down for the Piano Key border.

Assemble the top

Looking at the quilt drawing on the first page of these instructions, assemble the Log Cabin blocks into rows and sew them together.

First black border:

Cut side borders 3 inches and sew to quilt

Cut top and bottom borders 3.5 inches and sew to quilt

Coins border:

Cut coins 1.5 inches by 6.5 inches and sew into two strips for the top and bottom of your quilt. These will be approximately 6.5 x 53 inches but measure YOUR top and make them that length.

Second black border:

Cut 3.5 inches and sew to top and bottom of quilt.

Fabric Yardage

Normally I do not provide fabric yardage because my quilts are scrappy but I started with 12 fat quarters of black/white prints; used scraps of reds that equaled approximately 12 fat quarters and EQ7 estimates that approximately 1.5 yards of black fabric are needed for borders and binding.
